

# MELON MIST SANI SPRAY AEROSOL FOGGING

## STOP THE SPREAD OF CORONAVIRUS WITH MELON MIST SANI SPRAY AEROSOL FOGGING

MELON MIST SANI SPRAY SOLUTION IS MADE UP OF 60% ALCOHOL. THIS IS USED TO KILL ANY AIRBORNE PATHOGENS AS WELL AS GIVING AN INITIAL BLAST TO ANY SURFACE PATHOGENS.

EASY TO USE | TOTAL COVERAGE | COST EFFECTIVE  
PROVEN TO KILL CORONAVIRUS & COVID-19

### HOW MELON MIST SANI SPRAY WORKS

- Simply push the button and vacate the area for 1 hour and let Melon Mist Sani Spray do the rest
- Melon Mist Sani Spray has been tested and approved to BS EN 14476, 1276 and 1650 to kill 99.999% of micro-organisms within 5 minutes
- Micro-particles of disinfectant diffuse throughout the space killing pathogens in the air and on contact surfaces
- Melon Mist Sani Spray disinfectant remains active on surfaces until used
- Melon Mist Sani Spray will sanitise a space up to 75m<sup>3</sup> without the requirement of staff or PPE and through its propellant technology it ensures full coverage
- Melon Mist Sani Spray also has an active biocide so it will remain active on surfaces after use
- Melon Mist Sani Spray puts the end user in control of fully sanitising their spaces that they deem are high-risk and can be used whenever clients feel it's necessary (after gatherings/local outbreaks etc)
- Safe to use around electronics
- No residue left behind due to the way in which the alcohol and propellant is combined

### SUITABLE FOR:

- Workspaces
- Medical – Doctors/Dentists
- Education
- Hairdressers/Beauty
- Sports Facilities
- Shops
- Hospitality – Hotels/Restaurants/Bars
- Transport – Buses/Taxis/Trains/Aeroplanes

### TRIPLE ACTION

- 1 Alcohol at 60% volume for instant disinfection of airborne and surface pathogens
- 2 Powerful 'broad spectrum' disinfectant that sanitises surfaces and remains active until depleted
- 3 Deodorises your space and leaves a fresh fragrance
